- Create department
- View department list
- Update department
- Delete department
- Bind agents with department
- Set department schedule

5. Agents

- View agents
- Create/update agent if allowed
- Assign agents to departments
- View agent availability/status
- Sync agents from Dialyra

6. Flows

- View available flows
- Select default flow
- Assign flow to automation

7. Audio Library

- Upload audio
- View uploaded audio
- Delete audio
- Use audio in flow/prompts

8. Call Queue

- View waiting calls
- View retry queue
- Cancel queued call
- Retry failed call manually
- Process calls when slot is idle

9. Call History

- View completed/failed calls
- Filter by order/status/date/phone
- View call duration/result
- Link call with WooCommerce order

10. Balances

- Show current balance
- Refresh balance
- Show low balance warning

11. Settings

- Manage access token
- Regenerate access token
- Configure call trigger mode
- Set instant/delay/status trigger
- Select default flow
- Set max concurrent calls
- Configure retry policy
- Configure business hours
- Configure webhook secret
- Configure order status mapping

12. Test Tools

- Test call
- Test webhook

WooCommerce native areas:

WooCommerce Order List

- Manual call button
- Hangup button
- Retry button
- Show latest call status

WooCommerce Order Details

- Dialyra call panel
- Call timeline
- Latest call result
- Manual call/hangup/retry
- Order notes from webhook
